ABOUT ME

Aspiring Electronics and Communication Engineering student passionate about robotics, embedded systems, IoT, PCB design, and artificial intelligence. Enjoys transforming ideas into practical hardware and software solutions through hands-on projects, with a goal of building intelligent robotic systems that solve real-world problems while continuously learning emerging technologies.

CORE SKILLS

Languages: C, C++, Python

Hardware & Embedded: Arduino & ESP32 Development, Embedded Systems & IoT, PCB Design (KiCad)

Tools & Platforms: Wokwi & Tinkercad Simulation, Windows & Basic Linux

FEATURED PROJECTS

Moon Rover

- Designed a prototype rover for rough-terrain exploration using embedded electronics and motor control.

Smart Parking System

- Built a full-stack IoT parking solution combining an ESP32 hardware controller, a Next.js web application, and a serverless Upstash Redis database for shared real-time state.
- Implemented ultrasonic (HC-SR04) slot-occupancy sensing, dynamic duration-based pricing, and automated gate/LCD control on the ESP32, which posts status to the API every 2 seconds.
- Developed a public status page for live availability and payments plus an owner dashboard for managing pricing and payment history.
- Designed a simulated test-mode payment gateway (Card & UPI) mirroring a real two-step create-order/confirm-order flow.

DeepTrck — [deeptrck.vercel.app](#)

- Created a productivity platform to help users organize tasks and stay focused.

Arduino & ESP32 IoT Projects

- Built cloud-connected IoT applications using ESP32, Wi-Fi, and ThingSpeak.

WhatsApp Chatbot

- Developed an automated chatbot to streamline customer communication for businesses.

EXPERIENCE & CERTIFICATIONS

- Entry-Level Robotics, IoT & AI Internship — Pray Labs, Tiruvannamalai
- PCB Designing Training-cum-Internship — PCI
- Coursera: Basic Robotics
- Udemy: Basic Arduino

VISION

To become a Robotics Engineer specializing in autonomous systems, embedded electronics, and AI-driven robotics — contributing to innovative technologies that create real-world impact.
